Every puzzle has been checked to make sure it has
exactly one solution that can be reached by logic alone.

How to play

Every puzzle in this book is built from two adjectives with opposite meanings. Each adjective has three forms: the adjective itself, the comparative and the superlative. That gives six forms, which are printed in a box at the top of the page.

Fill the grid so that every row, every column and every box of 2×3 squares contains each of the six forms exactly once.

Each puzzle has one solution, and you can always find the next form by logic. You never need to guess.

The book has five chapters. Each one opens with a short note on a spelling rule. Inside each chapter the puzzles get harder. The stars at the top of each page show the level: one star is easy, two stars medium and three stars hard.

Tip: when you finish a puzzle, make two sentences with the forms, for example: "My brother is taller than me." "He is the tallest person in our family."

The solutions are at the back of the book.

Chapter 1

Add -er and -est

The rule

Most short adjectives (one syllable) add -er for the comparative and -est for the superlative.

Examples

tall → taller → the tallest

old → older → the oldest

We usually use the before a superlative: She is the tallest girl in the class. After words like my, your or Europe's, we leave out the: my best friend, Europe's highest mountain.
