

House Number Puzzle Answers

Solution:

1. **Emma** lives in an even-numbered house, but not next to **James**, so she can't live in house **14** or house **16** (since these houses are next to others). **Emma** must live in **house 18**.
2. **James** doesn't live in house **12** or house **18**. He must live in **house 16**.
3. **Oscar** lives next to **Lily**, but not in house **14**. If **James** lives in house **16** and **Emma** lives in house **18**, then **Oscar** must live in **house 12** and **Lily** in **house 14**.

Final answer:

- **Emma** lives in **house 18**.
- **James** lives in **house 16**.
- **Lily** lives in **house 14**.
- **Oscar** lives in **house 12**.
